Additional features of Movie Organizer let you get statistics and download items from the MOODb website, edit movie sections, use the cut, copy and paste functions, customize the columns, as well as use a quick or advanced search tool. It runs on a very low amount of CPU and system memory, has a good response time, supports keyboard shortcuts, and includes daily tips. We have not experienced any problems during our evaluation; Movie Organizer did not freeze, crash or display errors. But the app has not been updated for a long while, and the outdated interface is a small proof of that. Plus, you cannot configure program settings, such as minimizing Movie Organizer to the system tray area. You will need a database from MOODb to be able to see whether the information is there or not. This is currently free. There are also other databases available. More than enough for Movie Organizer to find movies or TV shows. Is it worth the money? Considering that this is not the easiest of apps to find, it is. If you are a movie fan this is worth the money. 4.0 Movie Organizer has not been updated for a long time, and the interface is dated.
